

## Deakin University Building LA & LB Cladding Replacement

In the fourth quarter of 2019, Kane Constructions was awarded the \$3M Lump Sum contract to deliver the Deakin University Building LA & LB Cladding Replacement project.

Works involved the replacement of combustible cladding and refurbishment of non-combustible cladding on two buildings at the Deakin University Burwood campus. The existing combustible cladding was removed and replaced with Mondoclad solid aluminium cladding. The non-combustible cladding was removed, cleaned and re-instated. The existing substructure was also rectified as part of the works.

Works were completed in May 2020.
