

## Evans Street, Sunbury Multi-Level Car Park

In early 2023, Kane Constructions was awarded the \$39 million design and construction contract for the Evans Street, Sunbury Multi-Level Car Park.

The new multi-level car park, strategically located to serve the Sunbury Town Centre precinct, features a modern four-storey structure with 693 parking spaces. Of these, 428 are dedicated to commuters, while 265 are allocated for short-term use, ensuring convenience for both daily travellers and visitors to the area.

Key features of the car park are:

- **Modern Design:** The four-storey building is equipped with 693 car parking spaces, catering to both commuters and short-term users
- **Enhanced Accessibility:** Two dedicated lift and stairwell cores located on the northern and eastern sides of the structure provide easy pedestrian access
- **Future-Proof Construction:** The car park is designed to accommodate future developments and infrastructure needs, ensuring long-term usability

In addition to providing ample parking for commuters, the new car park increases availability for shoppers and visitors, supporting the vibrant Sunbury Town Centre. This development marks a significant step in Sunbury's evolution as a hub for business attraction and investment.

The project reached Practical Completion in July 2024.
