

Redcliffe State High School Year 7 Building

Kane Constructions were engaged by Point Project Management to construct the new Year 7 building for the Redcliffe State High School.

The project was a design and construct contract. This project is a two storey structure with general class rooms and a lift. Various design changes were made to meet the requirements of the school including a complete redesign of the landscape plan with three new landscape seating structures for the students.

Various finishes involved in the project include perforated screens, CFC cladding and patterned blockwork.

Kane worked closely with the client and the school to ensure the satisfaction of the end user.
