

Tamborine Mountain State School, Resource Centre & Multi-purpose Hall

This project involved the Design and Construction of a new Learning Centre and a new Multi-Purpose Hall for the Building Education Revolution.

Kane's design responsibility extended from the preliminary design phase through to final construction documentation.

The learning centre consisted of a library, computer lab and staff amenities and included a screened veranda which doubled as an outdoor learning area.

The multi-purpose hall was designed to be used as a general assembly and sports activities. The hall included a performance stage, student amenities, sports flooring, sports equipment and provisions for equipment storage.
